

D2420

Hydrogen Sulfide in LPG

ASTM D2420

This test method covers the detection of hydrogen sulfide in liquefied petroleum (LP) gases. The sensitivity of the test is about 4 mg/m³ (0.15 to 0.2 grain of hydrogen sulfide per 100 ft³) of gas.

Features

- Stainless steel cylinder 500 ml with valve
- Stainless steel tubing with needle valve
- Water bath with temperature thermostat
- Glass cylinder
- Watch glass
- Stopper
- Lead acetate test paper
- Flow indicator

Power Supply

- 220 Vac 50/60 Hz
- Cable with Shuko plug

Dimensions

- 70 × 50 × 60 cm

Weight

- 20 kg
